zomato

Food delivery

Food delivery business is a complex three-sided marketplace

Why is food delivery complex?

1. **Perishable products** – require careful handling with real-time execution

2. **Three-sided marketplace** – one of the few internet categories with a three-sided marketplace, making it tougher to achieve marketplace balance

3. **Complex "technology + operations" business** – algorithms require years of training for real-time demand forecasting, fleet optimization and order dispatch, at scale

4. **India: a unique market** – restaurant food consumption amongst the lowest in the world with highly fragmented and unorganized restaurant supply

Note: All numbers shown above are average monthly for Q1FY23

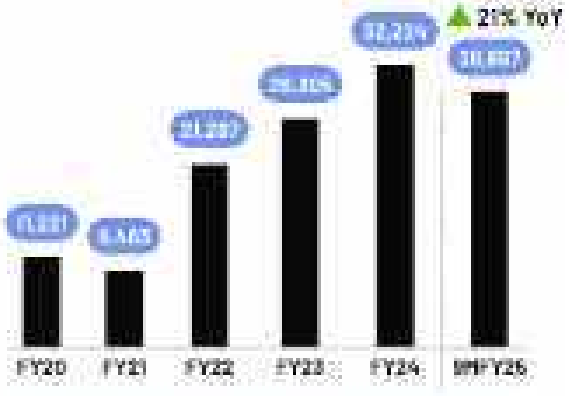

Zomato has built a large and resilient food delivery business

GOV

INR crore

CAGR: 30% (FY20-FY24)

We expect GOV to continue growing at 20%+ YoY

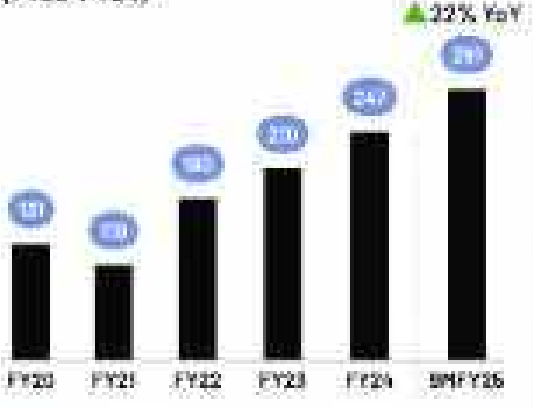

- Large runway for growth given low restaurant food penetration in India
- Zomato driving better accessibility, choice and affordability of restaurant food

Restaurant partners

'000

CAGR: 17% (FY20-FY24)

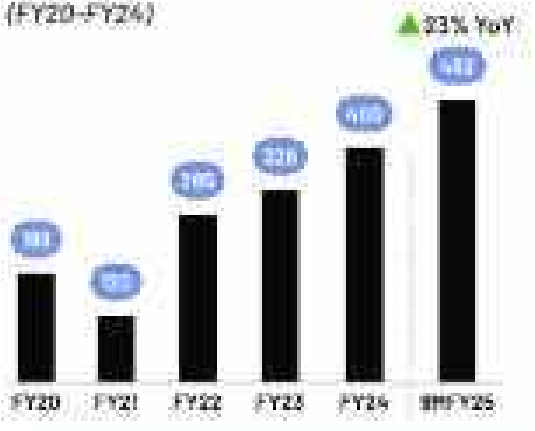

- Highly fragmented restaurant base with only a small share of GOV from chain restaurants
- Restaurant base continues to grow as food delivery market still underserved from a supply standpoint

Delivery partners

'000

CAGR: 21% (FY20-FY24)

- 1P business model, with over 95% of orders being delivered by network of independent delivery partners

Note: 1) Restaurant partners denotes average monthly active food delivery restaurant partners for the period. 2) Delivery partners denotes average monthly active delivery partners for the period.

The business is now sustainably profitable

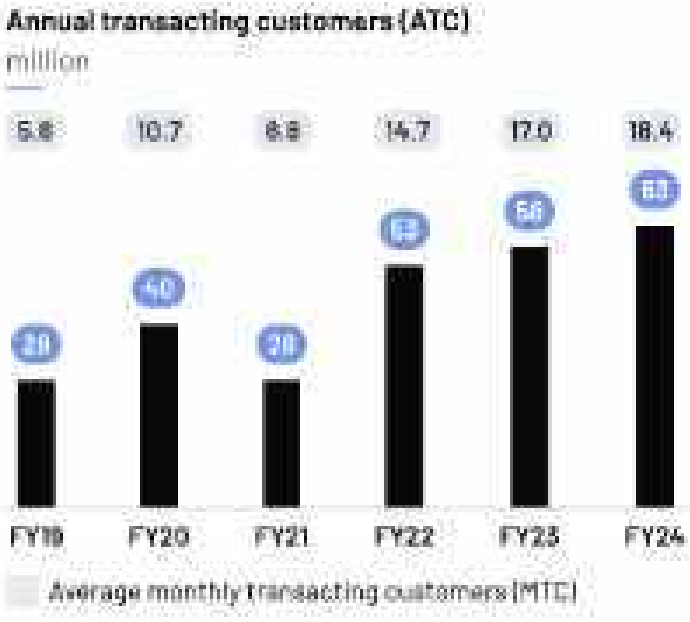

Adjusted EBITDA

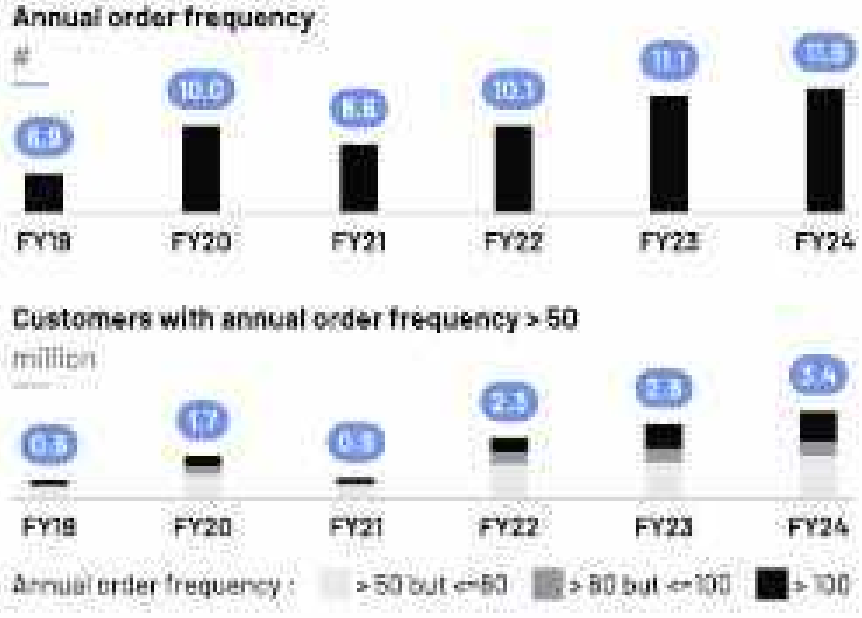

as % of GOV

- Adjusted EBITDA (as % of GOV) has improved steadily each quarter, over the last 3 years
- Progress in profitability a result of incremental improvements in scale, efficiency and durability of the business
- Investments in category creation now largely behind us; Adjusted EBITDA (as % of GOV) expected to stabilize around 5%

Our customer base is growing and their order frequency is increasing

- We expect GOV growth to be driven by (a) growth in monthly transacting customers (MTC) and (b) growth in number of power customers (order frequency >50 times a year)
- MTC to continue growing as more annual transacting customers (ATC) transact every month (reflected in increasing annual order frequency)
- ATC to also continue growing driven by new customer acquisition, which will further drive MTC growth

Note: 1) Annual order frequency computed as Orders for the year divided by annual transacting customers (ATC). 2) Average monthly transacting customers computed as average of monthly transacting customers for the period

The outcome - a large and growing business with sustained cash generation

Food delivery business currently generates ~INR 1,700 crore of Adjusted EBITDA on an annualized* basis

blinkit

Quick commerce

What is quick commerce?

On demand delivery of thousands of products across multiple categories in 10 minutes through a separate app - Blinkit

On demand delivery in 10 minutes...

... of a wide assortment of products across categories...

... through a dense network of stores located in a 2-3km radius from customers

Why is quick commerce working?

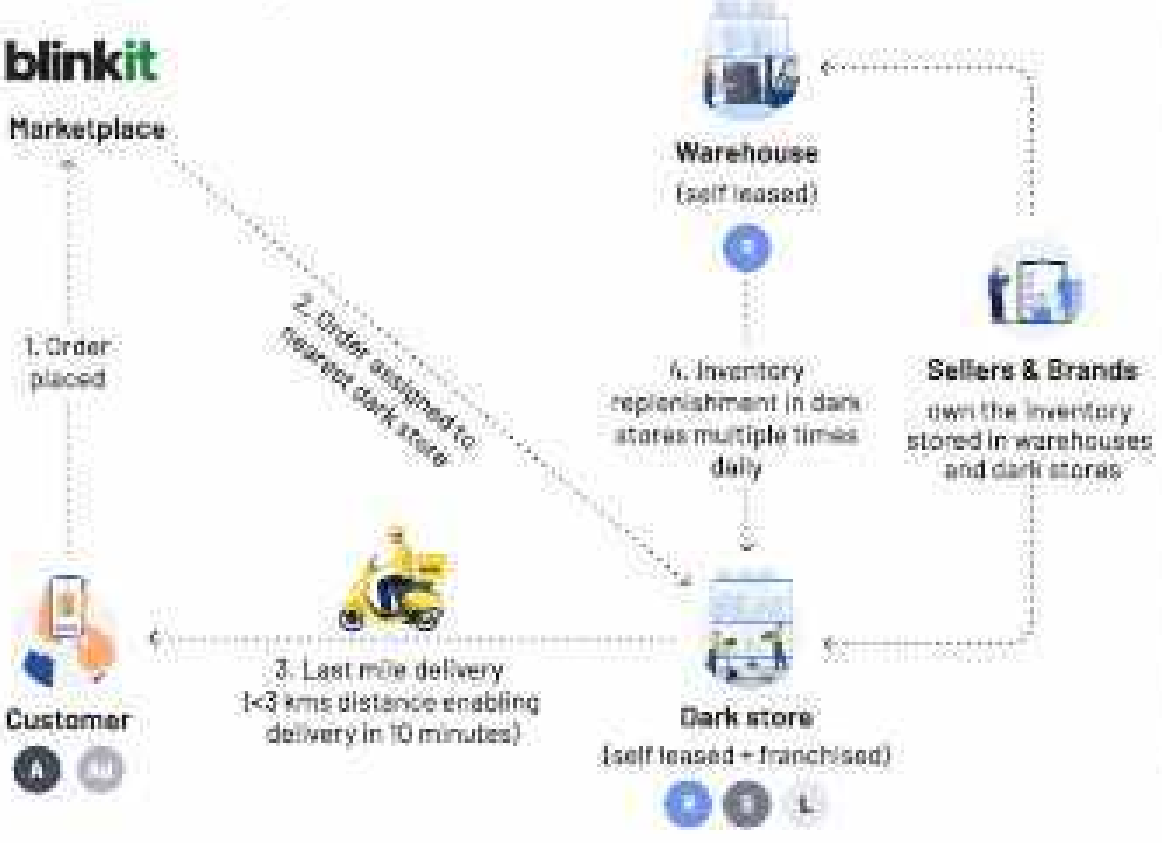

1. Mirrors existing offline customer behavior in India - frequent top-up purchases delivered quickly when needed

2. Addresses majority of customer's needs across multiple categories such as food (staples and fresh), electronics, beauty, general merchandise, festive needs++

3. Reliable quick delivery eliminates the need for planning

What makes quick commerce possible?

#1 Supply chain design

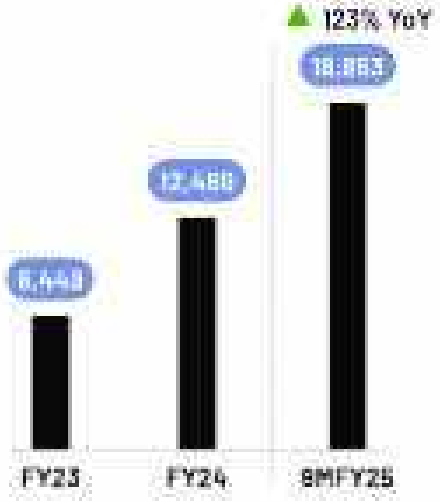

#2 End-to-end proprietary technology

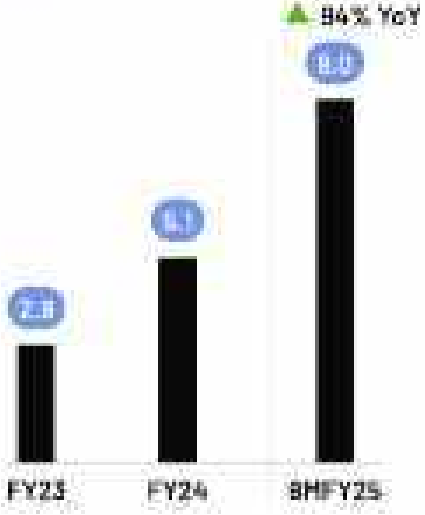

- **Replenishment design** – Assimilate purchase patterns to optimize product stocking quantities and replenishment cycles in stores
- **Store tech** - Products packed in under two minutes through smart pick-path optimization in dark stores
- **Location intelligence** - Optimizing store locations for shortest delivery times
- **Assortment science** - Neighbourhood level data on product searches and purchase patterns drives relevance and localization of assortment in dark stores
- **Ad-tech** – Self-serve platform for brands to access demand patterns to enable highly targeted advertising

The business is scaling rapidly...

- Blinkit GOV scaling rapidly driven by increase in transacting customer base and AOV; FY26 GOV expected to grow 100%+ YoY
- Increase in transacting customer base driven by rapid expansion of store & warehouse network across new and existing cities; store network expected to reach ~2,000 stores by Dec-25
- Increase in AOV primarily driven by expansion in assortment across categories

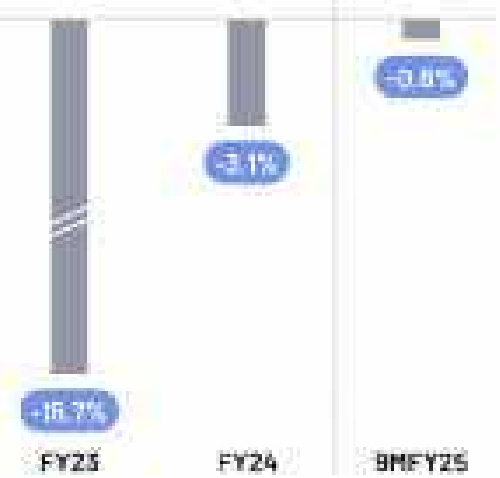

Notes: 1) Average monthly transacting customers computed as average of monthly transacting customers for the period; 2) Store count refers to the number of stores live as at the end of the period; 3) GOV FY23 and 9MFY25 numbers used for FY23 computation are unaudited; 4) FY23 based numbers are received from Blinkit; Consolidated Blinkit numbers in books of Eternal Limited is only from August 10, 2022 (date of transaction closing date)

...while making progress on profitability

Contribution
as % of GOV

Adjusted EBITDA
as % of GOV

- Improvement in profitability largely driven by operating leverage due to higher throughput per store
- Adjusted EBITDA margin declined to -1.3% in Q3FY26 primarily due to pulling forward of growth investments (store network expansion, customer acquisition spends, backend infrastructure)
- Investments in expansion expected to continue in the near future; steady state Adjusted EBITDA expected to be around 4–5% (% of GOV)

Note:
1) GOV, Y23 and Q3FY26 numbers used for FY25 comparisons are unaudited. MIS-based numbers are not derived from Ind AS. Consolidation of Shiprocket numbers in books of Eternal is only from August 10, 2022 (towards transaction closing date).

district

Going-out

We are building a one-of-a-kind destination for going-out experiences in India

- Through 'District' - our dedicated going-out app, we enable discovery and transactions for multiple going-out experiences including dining-out, movies, sports & other live events
- Our focus is on building 'District' as the go-to destination when customers think of going-out

- Discovery, table reservations and transactions across restaurants
- Ticketing partner for all major movie chains (PVR Inox, Cinepolis etc.) & access to ticketing inventory across 5,000+ screens pan-India
- Ticketing for a variety of live sports events in the country; exclusive access to ticketing inventory for 5 IPL teams
- Ticketing for third party and co-produced events across music concerts, theatre, comedy shows, others

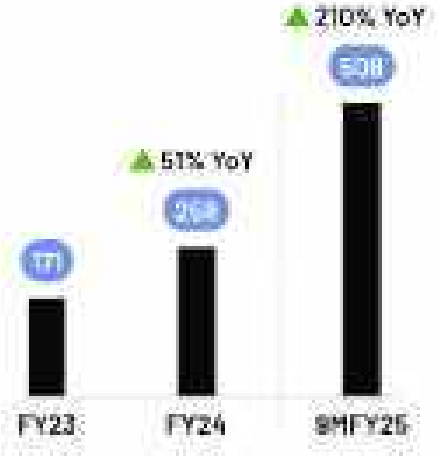

Immediate priority is to build strong customer engagement across existing categories (dining-out, movies, sports and live events) which will give us the right to build and scale other categories and use-cases in the future

The business is still nascent with a large, untapped opportunity ahead

hyperpure

B2B supplies

Hyperpure is solving 'sourcing' for restaurants

- Restaurant B2B supplies market in India is highly fragmented and unorganized, leading to inconsistency in product quality, availability and yield
- Hyperpure is solving the above problem for standalone restaurants and regional chains (that form bulk of the restaurant supply in India) through its end-to-end B2B supply chain for food ingredients and other products
- Hyperpure operates a 1P model (i.e., owns inventory) where it sources directly from farmer producer organizations, traders and brands and supplies to restaurants and other B2B customers

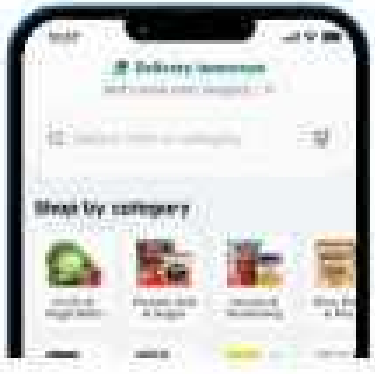

Why restaurants choose Hyperpure

Consistent high quality, predictable yields

Reliable and timely delivery

Competitive pricing

Single vendor for multiple needs offering 6,000+ products

Transparent operations

Revenue
INR crore

CAGR: 152%
(FY21-FY24)

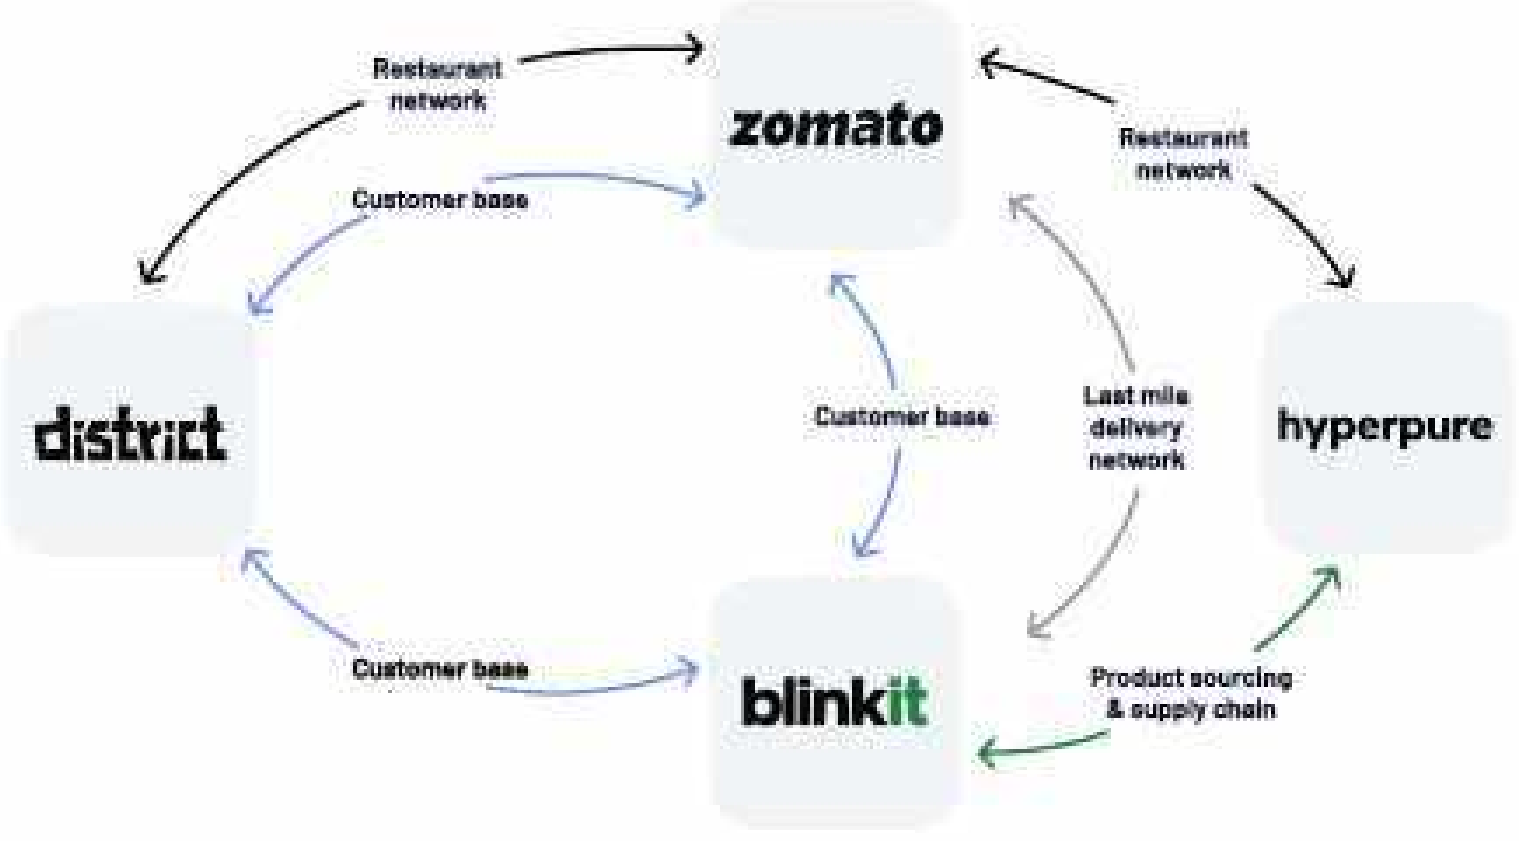

Adjusted EBITDA
% of Revenue

- Revenue growing rapidly given the large B2B opportunity
- Improvement in profitability driven by (a) higher throughput resulting in better utilization of existing supply chain and (b) increase in gross margins due to scale benefit and growing share of higher margin/ value added products
- Business is working capital intensive since inventory is owned by Hyperpure

Our businesses feed into each other and further enhance our core strengths

Our impact beyond business ...

Feeding India

- Feeding India addresses hunger and chronic malnutrition among underserved communities in India, especially children
- Operates one of India's largest non-government feeding programs in low-income affordable schools; served **190+ million meals** till date

Delivery partner welfare

- Generate flexible **earning opportunities for millions** of delivery partners, with their earnings growing steadily
- Social security benefits such as **free insurance (accident, death and health cover)** for all delivery partners; claims of over INR 100 crore processed in the last three years
- Onboarded 478 persons with disability as delivery partners and expanded our women delivery partner base to 2,500+ in FY24

Disclaimer

Use of non-GAAP financial measures

In supplement our financial information presented in accordance with IND AS, we consider certain financial measures that are not prepared in accordance with IND AS, including Adjusted Revenue and Adjusted EBITDA. We use these financial measures in conjunction with IND AS measures as part of our overall assessment of our performance to evaluate the effectiveness of our business strategies and to communicate with our board of directors concerning our business and financial performance. We believe non-GAAP financial measures provide useful information to investors about our business and financial performance, enhance their overall understanding of our past performance and future prospects, and allow for greater transparency with respect to metrics used by our management in their financial and operational decision-making. We are presenting these non-GAAP financial measures to assist our investors and because we believe that these non-GAAP financial measures provide an additional tool for investors to use in comparing results of operations of our business over multiple periods. Information given also includes information related to material subsidiaries.

Non-GAAP measures used by us are defined below:

- Adjusted Revenue = Consolidated revenue from operations as per Ind AS 115 – (-)certain customer delivery charges in the food delivery business that are discounts, including free delivery discounts on account of Zomato Gold program (-)+platform fee paid to the food delivery businesses that is not already included in reported revenue from operations
- Adjusted EBITDA = Consolidated EBITDA (-)share-based payment expense (-)rental paid for the period pertaining to Ind AS 116 leases
- EBITDA = Profit/(loss) as per financials excluding (i) tax expense/(credit) (ii) other income (iii) depreciation and amortisation expense (iv) finance cost and (v) exceptional items

These metrics have certain limitations and hence should be considered in addition to, not as substitutes for, or in isolation from, measures prepared in accordance with IND AS.
