MISSION

"Elevate the quality of life of urban consumers by offering unparalleled convenience"

From the CEO's desk

Dear Shareholders,

It is my pleasure to present to you our Q2FY27 Shareholders' letter.

This was a quarter in which our businesses grew faster and our direction became clearer. At our first ever Capital Markets Day held on 6-Aug-26, we shared our long term aspiration to build towards INR 10,000 Cr of Adjusted EBITDA by FY31, at GOV of over INR 2.5 lakh Cr with ~4% margins. From a headline perspective, this quarter, B2C GOV grew 24.6% to INR 20,793 Cr, and Consolidated Adjusted Revenue grew 33.8% to INR 7,909 Cr.

Quick commerce delivered the acceleration in growth as we had indicated. NOV grew 13.4% sequentially against 2.5% in Q1 to reach INR 6,594 Cr and orders were up 29.3% YoY to 130 million. We added a healthy base of 1.3 million users during the quarter to reach 14.8 Mn (up 23% YoY) as we focussed on habit building interventions and hyperlocal actioning while delivering improved frequency and superior retention metrics. Contribution margin was -1.0% of GOV within the range guided earlier, as we added 69 net stores, taking the network to 1,240 stores across 133 cities, and invested in differentiated assortment, availability and service quality. The Adjusted EBITDA losses rose by INR 46 Cr YoY to INR 895 Cr. We expect continued sequential growth in Q3 with operating margin improvement hereon.

As speed and price become table stakes, we believe differentiated assortment will decide the winners. We presented Switch, which brings together partnerships with ~400 brands, No!ce, our private brand, now in 1 in 8 baskets with ~15 pp higher retention, and Nectr, our curated fruits and vegetables offering. For instance, in categories such as high-protein atta, Switch SKUs drove 51% of category growth in four months. A key update in the quarter was shareholder approval on the cap on foreign shareholding at 49.5% (fully diluted basis) to qualify as an Indian Owned and Controlled entity. The transition will allow Instamart to own inventory, and is expected to complete over the next few quarters, with a net margin benefit of about 80 bps.

Food delivery GOV grew 17.7% YoY to INR 10,054 Cr, strongly exiting the quarter with Sep-26 clocking 20%+ YoY growth as we enter the festive quarter. We reported our highest ever Adjusted EBITDA of INR 341 Cr at best ever Adjusted EBITDA margin of 3.4% of GOV (+58 bps YoY). Toing, our standalone affordability app, is now in 50+ cities, and two in three of its new users are either new to Swiggy or long-term dormant. The annual guidance of 18-20% for Food delivery (ex -Toing) remains unchanged.

Out-of-Home Consumption grew GOV 34.9% YoY to INR 1,508 Cr, with active restaurants up to 66k (+48% YoY). The business has now been Adjusted EBITDA-positive for seven consecutive quarters, and we continue to open Dineout offering in more cities taking the total count to 80+ now. We are also

experimenting with new offerings like dining vouchers, in-restaurant & in-cinema ordering to fuel future growth.

During the quarter, we advanced our sustainability and social-impact priorities by focusing on enabling lower-emission deliveries, strengthening delivery-partner welfare and enhancing our ESG governance and reporting framework. We enabled over 50,000 delivery partners across India to file their Income Tax Returns (ITR) directly via the delivery partner app for our Food Marketplace and Instamart businesses. The initiative enabled INR 6.5 Cr of cumulative income tax refund claims for delivery partners. Additionally, more than one-third of the delivery partners filed returns for the first time, joining the formal financial ecosystem. To accelerate EV adoption, Instamart co-located battery-swapping at last mile stations, saving delivery partners up to 60 minutes daily and lowering rental costs by up to 30%.

We also continued to assess emerging regulatory requirements for extended producer responsibility, emphasizing building robust processes and traceability across our operations. Our approach remains focused on embedding environmental and social considerations into how we operate and grow, while creating a more resilient ecosystem for delivery partners, restaurant partners and the communities we serve.

I thank our customers, restaurant and brand partners, delivery partners, employees and shareholders for their trust.

Regards

Management Perspectives

1. **Food delivery YoY growth stood at ~18% in Q2FY27. Does the 18-20% GOV growth guidance for the full year still hold in Food Delivery?**

   Food delivery GOV grew 17.7% YoY to INR 10,054 Cr in Q2FY27 (+5.9% QoQ). The shape of demand in the Food delivery segment continues to evolve. An increasing share of affordability-led demand is being served through the 99-Store (on the core Swiggy App) and Toing, the dedicated app for budget friendly meals (more on this later) as we continue to expand the total addressable market for the segment. In the short term, there were some inter-play of demand levers on one platform vs the other which was hard to predict as we built out both the offerings.

   Our rapid experimentation over the last 2-3 quarters has given us some clear understanding on the use cases of both these offerings and we have been able to accelerate the food delivery platform growth (ex Toing) to over 20% in the month of Sep-26 with 20 million+ transacting user base. We therefore remain confident of achieving the full year guidance of 18-20% (ex Toing).

2. **Food delivery margins (Contribution and Adjusted EBITDA) sequentially improved with higher profitability. What led to margin expansion and is it sustainable?**

   Food delivery Contribution margin sequentially improved to 7.7% of GOV in Q2FY27 (+9 bps QoQ, +34 bps YoY), despite some of the investments towards the affordability thrust. The quarter also reported the **highest ever absolute Adjusted EBITDA** of INR 341 Cr (+INR 49 Cr QoQ) and **Adjusted EBITDA margins** of 3.4% of GOV (+32 bps QoQ, +58 bps YoY). Some of the margin expansion levers were a) Advertising-led monetisation that accelerated the take-rate to 26.1% during the quarter (+23 bps YoY, highest ever) and b) Delivery cost efficiency through higher order density and short-distance orders with increasing penetration of Bolt and 99-Store (collectively more than 25% of Food delivery volumes). Operating leverage continues to add to overall margin improvement.

   We expect the trajectory to continue towards the stated guidance of 5% steady state Adjusted EBITDA margin.

3. **What is the scale of Toing and should we expect to see continued investments towards it in the near term ? When can we expect more details on economic sustainability of the offering?**

   Toing (standalone app for affordable meal options) remains within Platform Innovations, a structured home to test new consumer propositions and innovation bets. The growth trajectory, value demand unlock and consumer adoption for Toing, while early, have been encouraging as we continue to iterate and solve for scalability.

a) **Product Market Fit:** We continue to see healthy user adoption for the offering demonstrating strong product market fit. The success benchmark remains the ability to attract new to Swiggy platform users which is demonstrated by 2 out of 3 users on Toing being first time Swiggy users or long term dormant on Swiggy. This shows that the proposition is adding to the overall category growth which was one of the fundamental tenets of launching a separate offering. Even for users who are transacting on both the platforms, the combined frequency is ~25% higher than their stand-alone platform frequency.

b) **Category growth expansion:** Toing's success can catapult combined Food delivery (Swiggy+Toing) marketplace growth to 25-30% (from the current guided range of 18-20%)**.** We are already seeing some of our cities reaching 20-30% of core Food delivery volumes in a very short time. The core Swiggy Food delivery profitability equation continues on its stated trajectory while Toing can potentially scale on the discretionary incremental investments for user acquisition with marginal overheads.

c) **Business market fit**: While any new launch necessitates investments in customer acquisition channels, user retention levers and under absorbed capacity costs, the success of the offering will be determined when unit economics of the repeat users turns positive and continues to scale with better monetisation and costs optimisation. We are happy to report early green shoots of the business market fit with unit economics turning positive for our repeat users in the earliest launched cities.

d) **Restaurants:** The long tail of value restaurants have benefited the most from Toing, observing meaningful uptick in order volumes with improved discovery.

While these early results are positive, we will need to continue to sharpen the proposition and work on monetisation and efficient cost structures to make it sustainable. To reiterate, we are applying the same discipline to Toing as to our other new initiatives, continuing to invest only as product and business-market fit becomes clearer. Toing runs on our existing tech and execution stack with no significant incremental fixed cost, unlike a new entrant building from scratch. As mentioned above, the primary investment is on new-user acquisition, which is discretionary and can be scaled up or down in an agile manner. Having said that, we do expect the overall investment outlay to be range bound in the short term. We shall have more clarity on scalability and efficacy of the model in the next 1-2 quarters enabling us to share more details on this.

4. What are the changes proposed in GST on delivery fees and impact on the ecosystem?

In the 57th GST Council meeting held recently, GST on delivery services provided through an E-commerce platform by an unregistered person was proposed at 5% instead of the current 18%.

This change will bring down the overall GST burden on the customers, thereby making the platform more affordable for our consumers. The date of the change of GST rate will be known

once the official notification is released by the Government which is expected in the next few days.

5. **Dineout / Out-of-Home Consumption delivered 35% YoY growth. How should we think about the forward looking outlook for the next few quarters?**

   Out-of-Home Consumption delivered GOV of INR 1,508 Cr in Q2FY27, up 35% YoY across 66k monthly active restaurant partners (+48.1% YoY).

   We continue to launch new frontiers of growth with each new offering opening up a new reason to dine out and bringing in new categories of restaurants onto Dineout, making it relevant to more occasions. Some of the recent initiatives include:

   Steal Deals lets diners buy a single dish from a restaurant at an accessible price. Selling a dish instead of a table makes Dineout far more relevant for quick-service restaurants, cafés, bakeries and dessert shops. It also brings in younger, impulse-led diners and extends our reach into smaller cities. **Digital Menu** takes Swiggy from the front door to the table. Diners scan a code, then order and pay from their phone, with no waiting for the bill. **Cine Dining** brings the same experience to the cinema, where guests order from their seat and have food delivered. **Scenes,** with its hyperlocal live events and experiences in and around restaurants, bars and cafés, completes the offering. Together, they form a complete going-out stack.

   Looking ahead, we expect Contribution and Adjusted EBITDA margin to continue improving sequentially on the stated path of 5% Adjusted EBITDA.

6. **Moving to quick commerce, after a few muted quarters, Q2FY27 saw double digit sequential GOV/NOV growth. What factors drove the acceleration and what is the growth outlook from hereon?**

   Q2FY27 saw acceleration in sequential growth with NOV growing 13.4% QoQ (vs 4% and 2.5% in the preceding two quarters) to INR 6,594 Cr with a volume growth of 13.8% QoQ. Three factors drove this:

   a) **Larger and higher quality user base:** With the culling of unprofitable users behind us, we added 1.3 Mn MTUs in the quarter (our highest addition in five quarters). Month-1 retention of the transacting user base averaged over 60% for the quarter which was meaningfully higher than the previous quarters. This retention curve along with higher frequency of repeat users led to an overall platform frequency increase of 4.2% QoQ.

   b) **Targeted pricing investments** to reactivate dormant base and drive habit building behaviours on the platform amongst the repeat users such as the INR 9 Store and cohorted pricing interventions. We also made certain tactical investments in speed and serviceability during the rainy season that drove higher retentions.

c) **Network expansion and differentiated assortment**: We added 69 dark stores during the quarter (equivalent to the previous 3 quarters' cumulative count) as higher growth led to more stores reaching maximum capacity utilisation. Our differentiated assortment strategy led by No!ce and Switch range of products continued to deepen user engagement.

Competitive intensity in the sector remains high, and we do not expect it to ease in the near-term with horizontal e-commerce majors also participating actively through the festive quarter. We expect the structural levers of user addition, retention and frequency to deliver another quarter of double-digit sequential NOV growth in Q3FY27.

7. Contribution margin dipped to -1% of GOV and absolute losses also increased sequentially. What were the investment choices made leading to higher operating burn?

As we had indicated last quarter, having achieved contribution break-even in May'26, we chose to calibrate near-term investments to accelerate growth while remaining within our guided range of zero to -100 bps on CM. CM moved to -1.0% of GOV in Q2FY27 (-82 bps QoQ, +157 bps YoY).

Notably, while our take rate declined by 140 bps QoQ, cost efficiencies and operating leverage normalised the impact to only 80 bps in contribution margin with the following break-up:

a) Targeted investments of 100 bps in habit formation and dormant-user reactivation

b) Adverse mix led impact of 40 bps due to change in user mix (larger share of new and reactivated cohorts) along with festive season led category mix change, and

c) Operating leverage and other cost efficiencies delivered 60 bps of improvement through higher store utilisation with orders per day per store increasing by 9.5% reaching 1,192 while adding 69 new stores whose under utilisation costs are expensed in contribution margin in the first 1-2 quarters leading to contribution margin headwinds in the near term.

8. How should we think about balancing growth investment against the path to Adjusted EBITDA breakeven guidance?

The pricing investments highlighted above are discretionary and transient in nature and we expect them to start reversing over the next couple of quarters with better retention and maturity of cohorts. We believe the Adjusted EBITDA losses to have peaked out in Q2FY27.

As stated in our previous communication, we expect the contribution margin to remain within the zero to -100 bps range in Q3FY27 with sequential improvements thereon. With the double-digit sequential NOV growth, we expect the Adjusted EBITDA margin as % of GOV improving by ~100 bps QoQ in Q3FY27.

Our path to Adjusted EBITDA break-even remains unchanged. We need ~2.3x today's scale (INR 60,000 Cr of annualised NOV, from INR 26,400 Cr today) and INR 30 of contribution per order.

Roughly two-thirds of this will come from higher revenue per order (product mix, own brands and advertising) and one-third from lower cost per order (densification, automation and operating leverage).

9. How is your differentiation strategy, including No!ce and Switch, playing out, and how did it contribute to growth this quarter?

As speed becomes table stakes in quick commerce and aggressive pricing proves unsustainable, we believe differentiated assortment will help us build a unique consumer proposition. As we shared at our Capital Markets Day, we view assortment as a curation game rather than a volume game, and our aim is to enable consumers to buy better, not just offer more.

The Switch proposition enables this through No!ce, Nectr and partnerships with around 400 brands to offer superior alternatives across core categories. As of Sep-26, Switch SKUs were part of over 20% orders on the platform, with SKUs available in over 60 categories.

1. **No!ce:** Our clean-food private brand now features in more than 1 in 8 orders across 500+ SKUs, and customers who buy No!ce show 15pp higher retention. No!ce is often priced at or near incumbent SKUs while offering superior quality, which also makes it margin-accretive.

2. **Nectr:** Our curated fruits and vegetables proposition is built around one of the most habit-forming daily categories. We launched in Bengaluru in Q2FY27, starting with select stores and widened coverage through the quarter. As of Sep-26, 1 in 6 of our Bengaluru customers bought a Nectr product.

10. What is the status of the IOCC transition and the move to inventory ownership in quick commerce? What is the likely impact on margin and working capital deployment as a result?

We would like to thank our shareholders for their overwhelming support for the resolution of capping our foreign ownership up to 49.5% (fully diluted basis), helping us transition to an India owned and controlled structure. We have since taken necessary regulatory approvals and the domestic ownership has risen to over 58%, on the back of growing appetite among domestic institutional investors.

The IOCC transition will start from mid-Q3 FY27, and we expect it to complete over the next 2-3 quarters. As we have mentioned in our previous communications, this has the potential to add ~80 bps to Instamart's contribution margin when fully rolled-out while giving us greater flexibility and control over assortment, pricing, availability and day-to-day operations.

As we transition to the inventory model, we expect to improve our overall working capital cycle by 8-10 days which should offset the additional investment in holding of the inventory on our balance sheet. We expect the net working capital days to normalise at ~15 days in this business on a steady-state basis. As a result, we do not expect any significant incremental working capital deployment in the business. We also do not expect any disruption to the customer experience or

to our supply relationships during this period and our teams have been preparing the operational groundwork in parallel.

11. Lynks Logistics was recently sold to Udaan. What was the rationale behind the transaction, and how will it affect the reported financials going forward?

Given our sharpened focus on consumer-facing businesses of Food delivery, Quick commerce, and Out-of-Home Consumption, we entered into an agreement to sell our entire shareholding in Lynks Logistics Limited, which houses our B2B authorised distribution business, to Trustroot Internet Private Limited, the parent entity of Udaan, for a consideration of ~INR 500 Cr in Sep-26. Together with a separate primary investment of INR 75 Cr, it will give us a ~3.2% stake in Udaan.

The Lynks business financials were reported within the “Supply Chain & Distribution” segment. Our Q2FY27 reported financial results include the Lynks financials for the full quarter, and will cease to be part of our reported results from Q3 FY27 onwards. As a result, we expect the segment EBITDA to improve by ~INR 20 Cr from Q3FY27 onwards.

Use of Non-GAAP Measures

In addition to financial information presented in accordance with Ind AS, we believe certain Non-GAAP measures are useful in evaluating our operating performance. We use these Non-GAAP financial information to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that Non-GAAP financial information, when taken collectively with financial measures prepared in accordance with Ind AS, provides an additional tool for investors to use in assessment of our ongoing operating results and trends because it provides consistency and comparability with past financial performance.

Non GAAP measures used by us are defined below :

Adjusted Revenue = Consolidated Revenue from operations as per financials plus (i) user delivery charges collected and passed on to delivery partners (net of any discounts, including free delivery discounts provided through Swiggy One membership program), plus (ii) fee from user (that is not already included in revenue from operations) collected and netted off from platform funded discounts given for corresponding orders.

Adjusted EBITDA = Profit/loss as per financials excluding (i) tax expense (ii) other income (iii) depreciation and amortization expense (iv) finance cost (v) exceptional items (vi) share in net loss of an associate (vii) share based payment expense and (viii) rental expenses pertaining to 'Ind AS 116 leases'

These measures should be considered in addition to, not as substitutes for, or in isolation from, measures prepared in accordance with Ind AS.

Independent Auditor's Review Report on the Consolidated Unaudited Quarterly Financial Results and Year to Date Financial Results of the Company pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended)

To the Board of Directors of Swiggy Limited

1. We have reviewed the accompanying statement of the consolidated unaudited financial results ('the Statement') of Swiggy Limited ('the Holding Company') and its subsidiaries (the Holding Company which includes the Swiggy Employee Stock Option Trust ('the Trust') and its subsidiaries together referred to as 'the Group') and its associate (refer Annexure 1 for the list of subsidiaries and associate included in the Statement) for the quarter ended 30 September 2026 and the consolidated year to date results for the period 01 April 2026 to 30 September 2026, being submitted by the Holding Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended) ('Listing Regulations').

2. This Statement, which is the responsibility of the Holding Company's management and approved by the Holding Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, Interim Financial Reporting ('Ind AS 34'), prescribed under Section 133 of the Companies Act, 2013 ('the Act'), and other accounting principles generally accepted in India and is in compliance with the presentation and disclosure requirements of Regulation 33 of the Listing Regulations. Our responsibility is to express a conclusion on the Statement based on our review.

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity, issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the Standards on Auditing specified under Section 143(10) of the Act, and consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

   We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33 (8) of the Listing Regulations, to the extent applicable.

4. Based on our review conducted and procedures performed as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in Ind AS 34, prescribed under Section 133 of the Act, and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in accordance with the requirements of Regulation 33 of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

Notes to the consolidated financial results

1 The above consolidated results were reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on October 22, 2025. The Statutory Auditors have conducted a limited review of these unaudited consolidated financial results and issued an unmodified review report thereon.

2 These consolidated financial results have been prepared in accordance with Indian Accounting Standards ('Ind AS') prescribed under Section 133 of the Companies Act, 2013, along with the relevant rules issued thereunder and other accounting principles generally accepted in India and in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ('Listing Regulations').

Statutory impact of new Labour Code[1]	-	-	-	-	-	10
Total	-	-	-	-	-	10

(i) Pertains to the one time impact arising from the implementation of the New Labour Codes effective November 21, 2025. Based on an actuarial valuation, the Company has recognised the increase in employee benefit liability arising primarily due to the change in wage definition as an exceptional item, considering the non-recurring nature of the impact.

4 Segment information

Operating segments are defined as components of an enterprise for which discrete financial information is available that is evaluated regularly by the Chief Operating Decision Maker ('CODM'). In deciding how to allocate resources and in assessing performance, the Group's chief operating decision maker is the Managing Director and Chief Executive Officer.

The operating segments comprise of:

(i) Food delivery: offer on demand food delivery services through a network of restaurant partners and delivery partners, which is available through mobile application and/or website

(ii) Out-of-home consumption: offers restaurant dining solutions (that we provide through DineOut) and access to curated outdoor events through Scenes

(iii) Quick commerce: offer of convenience grocery and a growing array of household items to customers through Instamart

(iv) Supply chain and distribution: other comprehensive supply chain services to wholesalers, retailers, and fast moving consumer goods ('FMCG') brands, leveraging our warehousing capabilities. We streamline the value chain and ensure reliable, fast, and cost-effective order fulfilment for wholesalers, retailers and FMCG companies.

(v) Platform innovations: consists of set of incubators for new service offerings to create more frequent and meaningful touchpoints for our users. This segment includes business verticals such as Swiggy-Minis, Swiggy Bolt, Snacc, Toing, Chew, Jus etc.

Independent Auditor's Review Report on the Standalone Unaudited Quarterly Financial Results and Year to Date Financial Results of the Company pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended)

To the Board of Directors of Swiggy Limited

1. We have reviewed the accompanying statement of the standalone unaudited financial results ('the Statement') of Swiggy Limited ('the Company') which includes the Swiggy Employee Stock Option Trust ('the Trust') for the quarter ended 30 September 2026 and the year to date results for the period 01 April 2026 to 30 September 2026, being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended) ('Listing Regulations').

2. The Statement, which is the responsibility of the Company's management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, Interim Financial Reporting ('Ind AS 34'), prescribed under Section 133 of the Companies Act, 2013 ('the Act'), and other accounting principles generally accepted in India and is in compliance with the presentation and disclosure requirements of Regulation 33 of the Listing Regulations. Our responsibility is to express a conclusion on the Statement based on our review.

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity, issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the Standards on Auditing specified under Section 143(10) of the Act, and consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

4. Based on our review conducted as above nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in Ind AS 34, prescribed under Section 133 of the Act, and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in accordance with the requirements of Regulation 33 of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.
